How to Keep Your Equipment Clean and As Safe As Possible

Rowing shells

All shells have been washed and disinfected before storing then on the racks at the Mudhole.

Before you take out a shell you should:

Get the spray bottle with disinfectant in the rigging box and spray the touch points. Make sure you carry hand sanitizer and use it before and after touching boat surfaces.

After you bring the shell back to the storage area you should:

Wash the shell with the provided hose, spray nozzle, buckets, sponges and biodegradable detergent while on the rolling rack.
Use the spray bottle with disinfectant in the rigging box and spray the touch points.

Oars

Before you take out a shell you should:

Get the spray bottle with disinfectant in the rigging box and spray the oar handles. Make sure you carry hand sanitizer and use it before and after touching oars and other equipment.

After bring the shell back to the storage area you should:

Wash the oars with the provided hose, spray nozzle, buckets, sponges and biodegradable detergent before placing them back on the oar rack.
Use the spray bottle with disinfectant in the rigging box and spray the oar handles.

ASSUME ALL EQUIPMENT IS NOT CLEAR!

Please get the equipment from the rigging box and return it as it was.
